

Let your wings fly wider with **SNU-IGCHE** programme

Where exclusive
learning begins...

IGCHE – Who are they?

IGCHE is run by a consortium of German universities seeking to institutionalise the exchange of Indian and German students by incorporating a considerable part of bachelor studies in the other country. IGCHE programmes are expected to experience the foreign culture first hand and upon completion serve as substantial catalysts of Indo-German collaboration. IGCHE is driven by following goals:

- Establishment of a premium quality, bilingual bachelor programs
- Substantial German language training incorporated into the regular teaching schedule
- German guest lecturers teaching selected courses in India
- Collaboration with German companies for internship in India and in Germany
- German universities which form IGCHE: TH Bingen, HS Bochum, HS Bonn-Rhein-Sieg, TH Deggendorf, HS Düsseldorf, FH Kiel, Westfälische Hochschule, HS Zittau/Görlitz

What do we provide?

• Summer internship to be provided to students every year in Germany

- SNU in collaboration with IGCHE will provide German language training to all academically bright students wishing to settle in Germany.
- German language through IGCHE will not only provide higher studies opportunities to students, but will also give them an advantage in job opportunities and career growth.
- IGCHE combines engineering studies with German language training. This gives the students a bachelor's degree that distinguishes them from others.
- The curriculum at SNU will be integrated with IGCHE programme. Students pursuing this programme will be receiving a joint/dual degree awarded both by SNU and IGCHE.
- IGCHE offers this elite opportunity to students of Electrical Engineering, Mechanical Engineering, Computer Science & Engineering & Information Technology.

All German IGCHE partner universities are state universities of applied sciences.

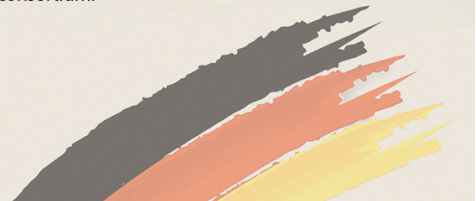

It is a known fact that higher education in Germany is highly subsidized.

So, it becomes an attractive education destination for students.

More than 240,000 young people from around the world study and research in Germany. There are 8 Universities included in the IGCHE consortium.

Learning the language will be fun and easy since it will be taught by native German teachers from level 2 onwards.

**Actual costs of internship in Germany to be borne by the students.*

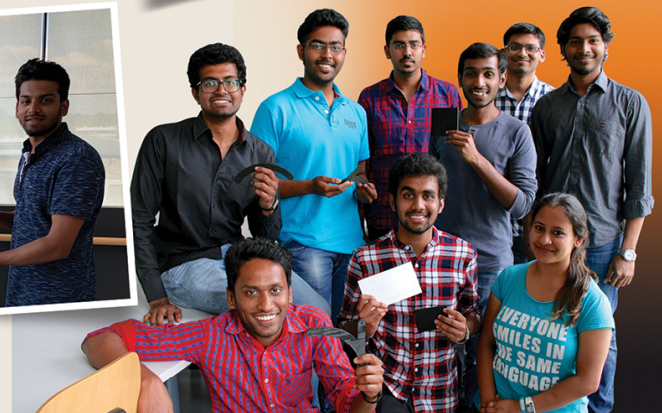

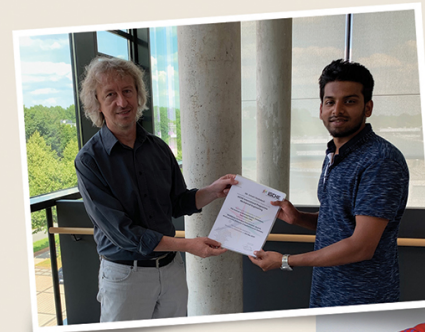

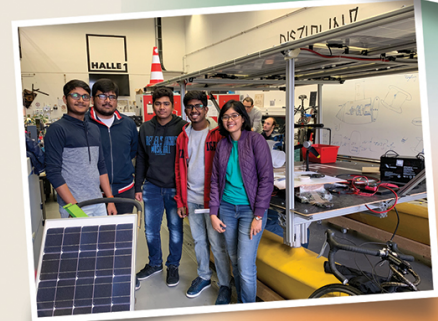

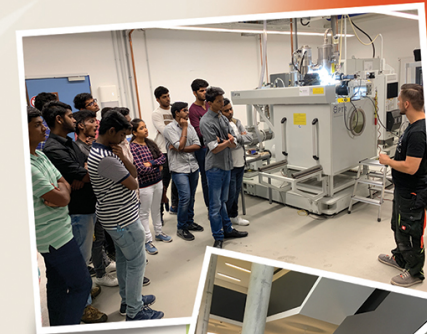

Indian Partners of IGCHE

1. PSG College of Technology, Coimbatore
2. Vel Tech Rangarajan Dr. Sagunthala R & D Institute of Science & Technology, Chennai
3. Techno India Group Universities/ Colleges which includes the following:-
 - Sister Nivedita University (SNU)
 - Techno International Newtown (TINT)
 - Netaji Subhash Engineering College (NSEC)
 - Meghnad Saha Institute of Technology (MSIT)
 - Siliguri Institute of Technolgy (SIT)
 - Techno International Batanagar (TIB)
 - Temple City Institute of Technology & Engineering (TITE)

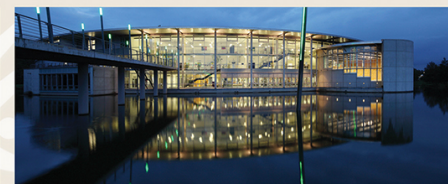

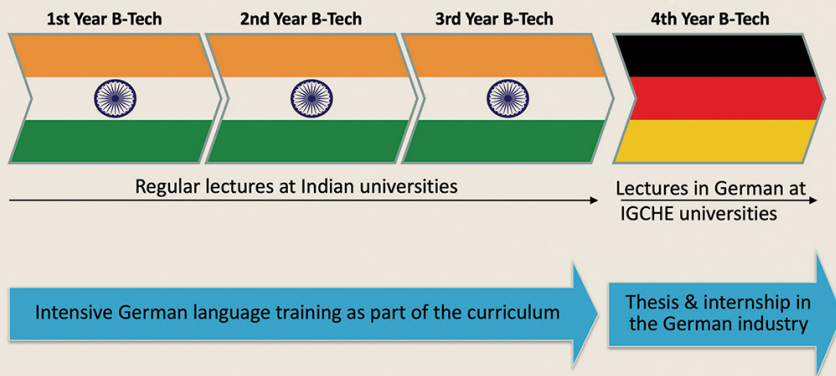

Why Us?

- Cross-Cultural experience through living and studying in Germany
- Strong focus on German language education and substantial practical orientation
- Students in 4th year of graduation will be studying in Germany which will include classroom teaching, industry-connect and internship opportunities
- Excellent job opportunities for students after graduating in top German industries
- Native German lecturers to give training to students (technical & language)
- Compulsory internship for every student as a part of their curriculum.

IGCHE guidelines:-

Through intensive German language training as part of the curriculum, candidates are enabled to complete their 4th year in Germany. Before coming to Germany, students must pass the standard German university level test. As part of the German study program, the students will be attending German classes and do their internship in a German company, which is preferably combined with a bachelor thesis of a practical orientation. Fluency in German opens excellent opportunities with respect to employability at leading German companies with business interests in India, as well as Indian companies with business interests in Germany. During the first three years in India, summer schools are organized by IIK (Institute for International Communication, Düsseldorf) which the students can attend during semester breaks. These stays in Germany boost both motivation and language proficiency.
